

BREAKING NEWS

7th February 2025 – FRANCE and GREECE JOIN NORTH

France and Greece are the latest to join the NORTH Group initiative having sent a letter and scientific lay summary to their respective heads of state, as well as other representatives, calling for an immediate suspension of COVID-19 mRNA vaccines.

NORTH was initiated on 25th November 2024, when an international group of politicians and leading medical and other professionals wrote to the heads of state of 10 European countries (Denmark, Estonia, Finland, Greenland, Iceland, Latvia, Lithuania, Norway, Sweden, and the United Kingdom) citing serious health concerns regarding COVID-19 modified mRNA vaccines.

Throughout December 2024, NORTH was joined by Belgium, Croatia, Czech Republic, Hungary, Ireland, Netherlands, Malta, Portugal, and Spain. Slovenia became the 20th country supporting the initiative on January 7th.

Many NORTH groups sent a second, follow up letter on 13th January to governments that had not yet replied to the original call in November.

Austria and Canada then joined NORTH on 20th January.

NORTH is now supported in 24 countries by over 800 international signatories. Citizens from other countries throughout the world are preparing to join NORTH in the coming weeks.

The letter from NORTH states:

- Scientific evidence shows that it was a lottery as to which batch of vaccine a person received and the side effects they experienced, including death.
- COVID-19 vaccines were never tested for their ability to block transmission.
- Modified mRNA vaccines contain variable but alarmingly high levels of residual DNA, which raises extreme concerns about the risks to human health including the potential for genetic damage.

The call has unprecedented international support and demands:

- *An immediate halt to the use of modified mRNA vaccines.*
- *An independent and transparent investigation into their approval and use.*
- *Scientific evidence that shows that there is no risk of damage to human DNA.*

Please share. MSM has declined sharing our previous press release due to editorial policy.
